University Guide 2025*

No.3

in London for Sociology
Complete University Guide 2025

At the School of Policy & Global Affairs, we proudly integrate the award-winning Career Activation Programme into our curriculum, ensuring students connect their academic journey with their professional aspirations. At the start of their studies, students participate in a career-focused ‘Finding your future’ module designed to help them make practical sense of their degree and explore diverse career pathways. City St George’s founding principles – to promote the education, wellbeing and employability of students from all backgrounds – are core to the School of Policy & Global Affairs. The School is a dynamic community, home to an inclusive mix of students, both local and global. It has around 2,400 students and over 100 academic staff.

By the end of their studies, every student will have engaged in a professional experience module or completed a placement, equipping them with real-world skills and experiences to confidently navigate their post-graduation ambitions.

The information on these pages is correct at the time of printing (February 2025). However, certain details are subject to change and students should refer to our website for up-to-date information.

Explore the complex and interconnected issues of crime, criminal behaviour and criminal justice.

Course modules include:

Year one

- Introduction to criminology
- Finding your future in criminology and sociology
- Data and the social world

Year two

- Gender and crime
- Penology
- Victimology

Year three

- Victims: policy and politics
- Crime, culture and the city
- Border criminology: critical and comparative perspectives

Career opportunities

Graduates of this course go on to work for professions concerned with criminal justice and crime reduction, including the police, prisons, offender management, youth justice and community safety.

Supported by Q-Step

Q-Step is an innovative programme designed to develop students' research and quantitative data analysis skills.

The School of Communication & Creativity supports and develops the next generation of practitioners and entrepreneurs who work across the cultural, creative, music, heritage and media sectors. We know diversity fosters creativity and innovation as our students come together from around the world, and from diverse educational and cultural backgrounds. We are dedicated to creating a place where everyone can thrive and belong, and we seek to empower students both to help us shape how we do this and to become future change-makers in the creative and communication industries.

The information on these pages is correct at the time of printing (February 2025). However, certain details are subject to change and students should refer to our website for up-to-date information.

BA Journalism

UCAS code: P500

Duration: 3 or 4 years (with placement or study abroad year)

Journalism education at City St George's has a real-world focus. Graduates are prepared to join thousands of our alumni working in journalism and media.

Course modules include:

Year one

- Introduction to digital journalism
- Introduction to news writing
- Journalism, history and culture

Year two

- Broadcast news live
- Employability for journalism
- Feature writing

Year three

- Reporting business
- Media law and ethics
- AI enhanced news reporting

Career opportunities

This degree is suitable for a career in journalism, or the cultural and creative industries, education, politics and the corporate sector. Graduates have gone on to work at the BBC, Sky News, The Sun, *Metro*, Associated Press, talkSPORT, MailOnline, *The Economist* and *Men's Health*. Others have gone into marketing and corporate communications.

medical education**

The School of Health & Medical Sciences is our newly integrated School, made up of the previous St George's School of Health & Medical Sciences and City's School of Health & Psychological Sciences. We are a leading provider of education in the fields of healthcare, medicine and psychology, offering a wide breadth of courses. We take pride in nurturing and developing the next generation of clinical practitioners and leaders. Through our strategic partnerships with top healthcare providers in London and the South-East, our students gain excellent placement experiences, ensuring they are prepared for their future careers. Our students come together from diverse educational and cultural backgrounds to use state-of-the-art clinical skills facilities at our Tooting (based in St George's Hospital) and Clerkenwell campuses, which create an exciting and innovative learning environment.

The information on these pages is correct at the time of printing (February 2025). However, certain details are subject to change and students should refer to our website for up-to-date information.

Explore the frontiers of language and communication science at one of the UK's most respected research centres.

Course modules include:

Year one

- Lifespan studies
- Speech and language development
- Professional studies

Year two

- Applied phonetics, phonology and linguistics
- Psychology and research methods
- Speech and language therapy and society

Year three

- Evidence-based practice
- Capstone module: building to autonomous practice
- Research project

Year four (optional)

- Language, learning, development and disorder
- Advanced professional practice
- Research project

Career opportunities

Graduates go on to work as speech and language therapists in health centres, hospitals, schools, charities and universities, as well as in the private sector. Some graduates choose to work internationally.

Accreditation

Graduates can apply to register with the Health and Care Professions Council to practise as a speech and language therapist.

Got a question about admissions?

www.citystgeorges.ac.uk/contact

Course structure:

Year one and two

- In the first two years of the course, students will learn about basic clinical sciences, mechanisms of disease and the ethical, psychological and social context of health, while developing their clinical and communication skills, integrated with early patient contact in hospital and community placements.

Transition (T) year (year three)

- In T year, the emphasis shifts to a combination of problem-based learning and experiential learning on five-week clinical placements in medicine, surgery and general practice, with a student-selected component (SSC) allowing students to develop their own interests.

Penultimate (P) year and final (F) year (years four and five)

- In P year, almost all learning is on clinical placements, including first exposure to a range of specialist areas, allowing students to hone their diagnostic skills and become confident developing investigation and management plans.
- F year lays the groundwork to becoming a foundation doctor, with assistantships in general practice, medicine and surgery, emergency medicine, critical care and anaesthetics as well as a public health block and an elective.

Students have the opportunity to apply to intercalate at City St George's or at an alternative institution

Career opportunities

Graduating with a degree in Medicine allows students to go on to postgraduate training as a doctor, with the vast majority choosing to enter the UK Foundation Programme, leading to a diverse range of medical careers.

Accreditation

Accredited and quality assured by the General Medical Council.

Gain the knowledge, skills and experience to become a confident, resilient doctor ready to provide excellent, compassionate care for patients.

Entry requirements

UCAT: minimum 500 in each individual section. Minimum overall UCAT score (calculated every year).

A-level: AAA, including Chemistry and Biology/Human Biology.

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 39 credits at Distinction (Biology and Chemistry credits must be at Distinction) and 6 credits at Merit in Medicine.

IB: 36 points overall, including 18 points at Higher Level and a minimum grade 6 in Biology and Chemistry.

GCSE: A minimum of grade 6/grade B in five subjects, including English Language, Mathematics and Science (Double or Triple Award).

English language requirements

IELTS: 7.0 overall with a minimum of 7.0 in Writing and 6.5 in all other components.

International equivalents

Scan for City St George's equivalences.

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

Additional requirements

As part of the selection process, shortlisted applicants will be invited to interview. Students that are made an offer will be required to complete an enhanced Disclosure and Barring Service, a health check and be declared fit to study and practise by the Occupational Health department before starting the course.

Course webpage

www.citystgeorges.ac.uk/hmed

MBBS Medicine (Graduate Entry)

UCAS code: A101

Duration: 4 years

Course structure:

Year one

- Year one is a fast-paced foundation to medicine covering basic clinical sciences, mechanisms of disease, communication and clinical skills, and the ethical, psychological and social context of health. Students will learn with a variety of methods such as problem-based learning, lectures and small group tutorials, and early clinical experience in hospital and community placements.

Transition (T) year (year two)

- In T year, students continue to develop their skills in assessing and investigating patients with a combination of problem-based learning and clinical placement blocks in medicine, surgery and general practice. Students also have the opportunity to develop their own interests with a student-selected component.

Penultimate (P) year (third year) and final (F) year (fourth year)

- In P year, almost all learning is on clinical placements, including first exposure to a range of specialist areas, allowing students to hone their diagnostic skills and become confident developing investigation and management plans.
- F year lays the groundwork to becoming a foundation doctor, with assistantships in general practice, medicine and surgery, emergency medicine, critical care and anaesthetics as well as a public health block and an elective.

Career opportunities

Graduating with a degree in Medicine allows students to go on to postgraduate training as a doctor, with the vast majority choosing to enter the UK Foundation Programme, leading to a diverse range of medical careers.

Accreditation

Accredited and quality assured by the General Medical Council.

Open to graduates from a wide range of science and non-science backgrounds, our course offers a fast-track route which condenses the first stage of a conventional medical degree, so students achieve the qualification in four years.

Entry requirements

Degree: 2:1 honours for UK undergraduate degrees or pass in UK postgraduate degrees (plus 2:2 honours in undergraduate degree) in any discipline or subject.

If students are applying on the basis of a degree, they do not need to meet our GCSE or A level requirements.

GAMSAT: minimum of 50 in each individual section. Minimum overall GAMSAT score (calculated every year).

English language requirements

IELTS: 7.0 overall with 7.0 in Writing and 6.5 in all other components.

International equivalents

Scan for City St George's equivalences.

Additional requirements

As part of the selection process, shortlisted applicants will be invited to interview. Students that are made an offer will be required to complete an enhanced Disclosure and Barring Service, a health check and be declared fit to study and practise by the Occupational Health department before starting the course.

Prepare for a fulfilling and rewarding career as a midwife.

Course modules include:

Year one

- Students learn to discuss underlying concepts and principles associated with midwifery and apply these within the context of their practice.

Year two

- Builds upon previous knowledge and experience. Students develop skills of enquiry in the subject and develop different approaches to problem-solving and interpreting the context of their practice.

Year three

- Students develop a coherent systematic, detailed knowledge of midwifery practice and theory. They learn to develop techniques for practice drawing on research and scholarship demonstrating their role as a reflective practitioner.

Career opportunities

Graduates secure employment with local NHS Trusts throughout London and nationwide, working in community services, birth centres, obstetric units, and as consultant midwives.

Accreditation

This course is accredited by the Nursing and Midwifery Council (NMC).

Year two

- Acute care management
- Pathophysiology and therapeutics for nursing practice
- Critical use of evidence to inform decision-making in practice

Year three

- Leading and managing others
- Principles of prescribing
- Elective module specific to Adult Nursing

Career opportunities

Graduates are highly sought by NHS trusts including Barts Health NHS Trust, Homerton Healthcare NHS Foundation Trust, Royal Free London NHS Foundation Trust, University College London Hospitals NHS Foundation Trust and St George's University Hospitals NHS Foundation Trust.

Students complete clinical placements at leading London NHS Trusts

Accreditation

This course is accredited by the Nursing and Midwifery Council (NMC).

Entry requirements

A-level: BBC.

BTEC: DMM (Health and Social Care, Sport and Exercise Sciences, or science-related subjects only).

Tariff: 112 UCAS tariff points.

Access to HE: QAA-recognised Access to HE Diploma (full award - 60 credits) in Nursing, Health, Science or Social Care: 45 credits at level 3 including 24 credits at Distinction.

IB: 29 points overall, including a minimum of 5 in Standard Level Mathematics and English.

GCSE: A minimum of grade 4/grade C in English Language and Mathematics. Level 2 Functional Skills in Mathematics and English will be considered.

English language requirements

IELTS: 7.0 overall with a minimum of 6.5 in Writing and 7.0 in all other components.

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

Additional requirements

As part of the selection process, shortlisted applicants will be invited to interview. Students are required to have occupational health and enhanced disclosure and barring service (DBS) clearance.

Prepare for a dynamic and rewarding career providing care to children and young people, focusing on family-centred care to improve the overall health and wellbeing of our future.

Course structure:

Year one

- Students will take part in simulated practice and clinical skills, and have practice placements to develop foundational nursing theory and practice for children and young people.

Year two

- Builds upon the theory and practice from year one, with a strong emphasis on public health and management of acute deterioration in the child and young person. Practice placements form a key element of this year.

Year three

- Student practice placements provide an opportunity to experience complex, high-dependency nursing care. This enables them to consolidate their theory and practice, using a more critical approach to complex nursing care.

Career opportunities

Our course offers a rich variety of practice-based learning across London, with international opportunities, which enable students to establish where they want to start their career as a children's nurse. Graduates are highly sought after by NHS trusts including Barts Health NHS Trusts Hospitals, Great Ormond Street Hospital for Children NHS Trust, Homerton Healthcare NHS Foundation Trust, University College London Hospitals NHS Foundation Trust, and Royal Free London NHS Foundation Trust, as well as various community settings.

Accreditation

This course is accredited by the Nursing and Midwifery Council (NMC).

BSc Occupational Therapy

UCAS code: B920

Duration: 3 years (with placement)

Enable people with physical and mental health challenges to participate in daily activities that matter to them.

Course modules include:

Year one

- Essentials for allied health professionals
- Theory and practice of occupational Therapy 1
- Understanding the evidence-base

Year two

- Human occupations across the lifespan
- Occupations in context
- Analysing the evidence base

Year three

- Contributing to the evidence-base
- Advancing occupational therapy practice
- Reflection and leadership in occupational therapy

Career opportunities

Graduates will be eligible to apply for both the Health and Care Professions Council and the Royal College of Occupational Therapists. As well as working with individual service users and their families, graduates can also work with groups and communities, or as part of a multidisciplinary team in various settings, such as hospitals, schools, clinics and charities.

Accreditation

Health and Care Professions Council, Royal College of Occupational Therapists and World Federation of Occupational Therapists.

Prepare for a career in Optometry at the only university in London to offer an undergraduate degree in the subject.

Course modules include:

Year one

- Biomedical sciences for optometry
- Fundamental clinical and professional practice skills
- Optics for optometry

Year two

- Ocular diseases and management
- Advancing clinical skills
- Contact lenses

Year three

- Clinical and professional practice
- Binocular vision and paediatrics
- Visual impairment

Year four

- Clinical learning in practice 1 and 2
- Clinical decision making

Students train with the latest equipment and techniques at our on-campus optometry clinic, City Sight

Entry requirements

A-level: AAB (including two from Biology, Chemistry, Mathematics or Physics).

BTEC: DDD (Applied Science, Medical Science or Biomedical Science) in addition to an A-level C grade or above in Biology, Mathematics or Physics.

Tariff: 136 UCAS tariff points.

IB: 33 points overall, including 6 in two Higher Level sciences and 5 in Standard Level English and Mathematics.

GCSE: A minimum of grade 4/grade C in five subjects, including English Language and Mathematics.

English language requirements

IELTS: 7.0 overall with a minimum of 7.0 in each component.

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

Additional requirements

- Have enhanced disclosure and barring service (DBS) clearance.
- Complete an occupational health questionnaire.
- Be eligible for student registration with the General Optical Council and maintain this registration throughout the course; more information will be provided on application.

Career opportunities

Optometry offers a diverse and flexible career, with opportunities in high street and independent practice, hospitals, research and teaching. Graduates can develop their skills and interests in a range of specialisms.

Accreditation

This course is accredited by the General Optical Council.

BSc Paramedic Science

UCAS code: B781

Duration: 3 years (with placement)

Train to become a paramedic in state-of-the-art simulation labs, including immersive rooms and gain hands-on experience through diverse, real-world placements.

Course modules include:

Year one

- Introduction to paramedic clinical care
- Applied critical care for paramedics

Year two

- Trauma care for paramedics
- Assessment and evaluation of mental health in out-of-hospital setting
- Professional practice 2

Year three

- Paramedic management of minor health problems
- Transition to paramedic practice

Career opportunities

Graduates can work in a variety of environments including traditional 999 ambulance services, GP practices, walk-in centres, minor injuries units, helicopter emergency services, research establishments, and remote environments like oil rigs or expeditions. Students can apply for registration with the Health and Care Professions Council on successful completion of the course.

Gain real-world experience on evolving, interprofessional placements every year of the course

Accreditation

This course is officially approved by the Health and Care Professions Council and is also endorsed by the College of Paramedics.

Entry requirements

A-level: BBB including one science subject.

BTEC: DDM (including one of Applied Science, Biology, Chemistry, Human Biology, Physics, Psychology and Sociology).

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 21 credits at Distinction and 24 credits at Merit in a science or healthcare subject (30 credits must be in a science subject).

IB: 30 points overall, including 14 points at Higher Level and a minimum grade 5 in Biology or Chemistry.

GCSE: A minimum of grade 4/grade C in five subjects, including English Language, Mathematics and Science (Double or Triple Award).

BSc Diagnostic Radiography (Tooting)

UCAS code: B821

Duration: 3 years (with placement)

Blending health and science, patient care and technological knowhow, diagnostic radiography is a dynamic, hands-on profession at the heart of modern healthcare.

Course modules include:

Year one

- Essentials for allied health professionals
- Principles and practice of radiography 1
- Professional values and ethics for radiographers

Year two

- Radiographic science and technology
- Principles and practice of radiography 2
- Research and evidence-based practice

Year three

- Dissemination of research
- Clinical competence and practice
- Contemporary issues in radiography

Career opportunities

With an ongoing national shortage of skilled radiographers in the UK, career prospects are excellent. Radiographers work within the NHS and private sectors as part of a multidisciplinary team with options to specialise and advance in different areas, such as paediatrics, urology, interventional and accident and emergency.

Professional Training Year

Students have the opportunity to undertake a Professional Training Year in industry or research

Career opportunities

Students are supported to develop key skills through careers activities embedded within the curriculum, allowing them to build the top ten employability skills that employers look for. Our graduates are highly sought after and pursue a diverse range of career paths in the biomedical sector and beyond, or continue to further study. Graduates have gone on to work in academic and applied research for a variety of pharmaceutical and bioscience companies and institutes and have also pursued a range of MScs, PhDs, graduate entry medical degrees or other vocational healthcare courses. Our graduates also take their skills into employment in a wide range of other sectors such as teaching, law, finance and many more.

BSc Clinical Pharmacology

UCAS code: B210

Duration: 3 years (with placement)

Explore how medicines work and what it takes to create new treatments to fight diseases. This course is the only undergraduate course of its kind in the UK.

Course modules include:

Year one

- Fundamentals of science
- Drug development
- Data and statistics
- Pharmacokinetics

Year two

- Skills portfolio
- Pharmacodynamics
- Research project

Year three

- Hot topics
- Written research project
- Disease/drug target

Career opportunities

With the race to find new drugs and vaccines in the fight against new infections and diseases, clinical pharmacologists are needed now more than ever. Graduates find work in drug regulation, running clinical trials and researching disease processes. Employers include the NHS, where they are critical to medicine management, and regulatory organisations such as the National Institute for Health and Care Excellence and the Medicines and Healthcare Products Regulatory Agency.

UCAS code: B120

Duration: 3 years (with placement)

Course modules include:

Year one

- Science of healthcare
- Cardiovascular and respiratory sleep science
- Professional practice 1
- Clinical training 1

Year two

- Cardiology/respiratory - sleep specialism
- Research methods
- Pathophysiology
- Instrumentation, signal processing and imaging
- Professional practice 2
- Clinical training 2

Year three

- Cardiology/respiratory - sleep specialism
- Research project
- Professional practice 3
- Clinical training 3

future skills

National Student Survey 2024

Career opportunities

On graduation, students will be eligible for professional voluntary registration with the Academy for Healthcare Science and will be Clinical Physiologist Practitioners in either cardiac or respiratory-sleep science.

New graduates can also apply for the Scientist Training Programme leading to the HCPC regulated Clinical Scientist title, graduate entry medicine or other postgraduate courses.

Accreditation

Accredited by the National School of Healthcare Science.

Diagnose conditions and provide vital treatments by specialising in cardiology, or respiratory and sleep physiology science.

Entry requirements

A-level: BBB including Biology or Human Biology and one other science subject.

BTEC: DDM (Applied Science).

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 21 credits at Distinction and 24 credits at Merit in a science subject.

IB: 32 points overall, including 15 points at Higher Level and a minimum of grade 5 in Biology.

GCSE: A minimum of grade 4/grade C in five subjects, including English Language, Mathematics and Science (Double or Triple Award).

English language requirements

IELTS: 7.0 overall with a minimum of 7.0 in Writing and 6.5 in all other components.

International equivalents

Scan for City St George's equivalences.

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

Additional requirements

As part of the selection process, shortlisted applicants will be invited to interview. Students that are made an offer will be required to complete an enhanced Disclosure and Barring Service, a health check and be declared fit to study and practise by the Occupational Health department before starting the course.

Foundation Degree Nursing Associate

UCAS code: B71F

Duration: 2 years (with placement)

Gain the skills, knowledge and confidence to care for patients as a nursing associate, across the four fields of nursing.

Course modules include:

Year one

- Introduction to health and wellbeing
- Introducing clinical and communication skills in practice
- Introduction to therapeutics and medicines management
- Learning in practice 1

Year two

- Teamworking and improving safety and quality of care
- Consolidating clinical and communication skills
- Promotion of health and development for self and others
- Learning in practice 2

Career opportunities

Graduates can register with the Nursing and Midwifery Council and practice as nursing associates in the UK or overseas (additional registration may be needed in some countries), or go on to study at bachelor's level entering at year two of the BSc Nursing courses at City St George's.

Accreditation

This course is accredited by the Nursing and Midwifery Council (NMC).

Entry requirements: UCAS route

A-level: CD.

BTEC: MPP (Health and Social Care or science-related subject only).

Tariff: 56 UCAS tariff points.

Access to HE: QAA-recognised Access to HE Diploma (full award - 60 credits) in Nursing, Midwifery, Health Science or Social Care: 45 credits at level 3 including 9 credits at Merit and 36 at Pass.

IB: 24 points overall, including a minimum of 5 in Standard Level Mathematics and English.

GCSE: A minimum of grade 4/grade C in English Language and Mathematics or equivalent qualification such as Level 2 Functional Skills/Key Skills in Mathematics and English.

English language requirements

IELTS: 7.0 overall with a minimum of 6.5 in each component.

Additional requirements

As part of the selection process, shortlisted applicants will be invited to an interview. Students are required to have occupational health and enhanced disclosure and barring service (DBS) clearance.

Got a question about admissions?

www.citystgeorges.ac.uk/contact

UCAS code: B70F

Duration: 1 year

This foundation course provides access to one of the following BSc courses at City St George's: Nursing (Adult, Children's or Mental Health), Midwifery or Speech and Language Therapy.

Course modules include:

- Introduction to science related to healthcare
- Academic skills
- Key skills in health sciences
- Personal and professional development
- Introduction to the healthcare professions

Career opportunities

Upon successful completion of the Introduction to Health Sciences course and of meeting the progression criteria, students can proceed onto one of the courses outlined above. Graduates will attain a Certificate of Higher Education which they can add to their CVs.

HE Certificate Introduction to Optometry

UCAS code: B513

Duration: 1 year

This foundation course provides access to the MOptom Optometry at City St George's or further study leading to a career in optometry.

Course modules include:

- Introductory biological sciences
- Optometric physics
- Quantitative methods for optometry
- Introduction to clinical skills
- Personal and professional development

Career opportunities

Successful completion of this course will result in a Certificate of Higher Education in Introduction to Optometry (European Qualifications Framework level 4). This can lead to several career routes including progression onto MOptom at City St George's (subject to meeting entry requirements), progression onto other higher education courses at City St George's or other institutions, or optical assistant roles within the private sector or the NHS Hospital Eye Service.

HE Certificate Introduction to Diagnostic and Therapeutic Radiography

UCAS code: B82F | Duration: 1 year

This foundation programme offers an introduction to clinical and professional aspects of radiography, with insights into medical imaging, radiotherapy treatment techniques and patient care.

Course modules include:

- Introduction to science related to healthcare
- Academic skills
- Key skills in health sciences
- Personal and professional development
- Introduction to the diagnostic and therapeutic radiography professions.

Career opportunities

Upon successful completion of the Introduction to Diagnostic and Therapeutic Radiography programme, students will become eligible to apply to either BSc Diagnostic Radiography or BSc Therapeutic Radiography and Oncology programmes at our Clerkenwell campus.

Progression will be dependent on: achieving above 40 per cent overall having successfully completed all modules for this programme; a successful admissions interview; satisfactory Disclosure and Barring Service (DBS) check; Occupational Health clearance; and completion of a radiography clinical visit form.

THE CITY LAW SCHOOL

106 LLB Law

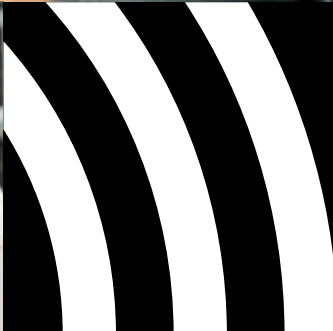

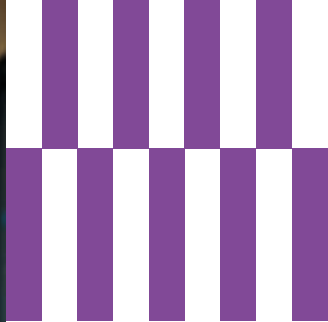

Did you know?

4 Prime Ministers

were educated at the Inns Court of Law,
which later became The City Law School

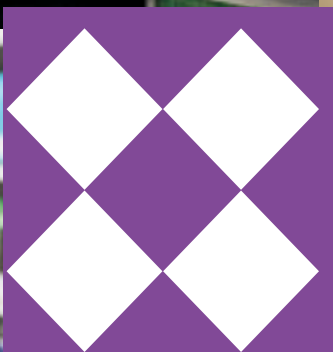

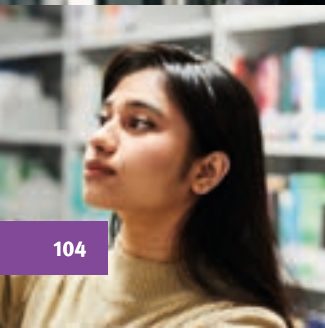

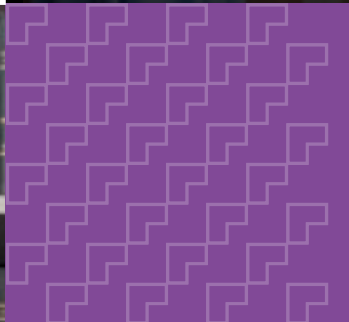

“The excellent location in the heart of London allowed me to balance professional and personal development, with many of the best legal firms nearby.”

Daria Eremina, Law

THE CITY LAW SCHOOL

Top 10

in London for law

Complete University Guide 2025

**Est.
1852**

**one of the earliest
providers of legal
education in London,
with a historic legacy of
leadership, innovation
and excellence**

The City Law School is not just a place of learning, it is a community of diverse minds and a hub for future leaders and innovators in the legal profession. We proudly continue our legacy of over 170 years in preparing a diverse and inclusive student body for thriving careers in the legal professions, business, and public service by providing a comprehensive approach to legal education and opportunities for real-world practice. Our location in central London brings students into close proximity to major UK and international law firms, courts and tribunals, including the Inns of Court and the Royal Courts of Justice.

The information on these pages is correct at the time of printing (February 2025). However, certain details are subject to change and students should refer to our website for up-to-date information.

The course equips students with legal skills and knowledge to succeed in law or other fields. Students can explore core legal subjects and choose electives that match their own interests, or choose one of five LLBs with specialisms. They gain practical experience through placements, pro bono work, volunteering, and mooting.

Course modules include:

Year one

- Principles of criminal law
- Principles of contract law
- Foundations of public law and human rights

Year two

- Principles of EU law
- Principles of land law
- Principles of tort law

Year three

- Principles of equity & trusts

Career opportunities

After completing the course many students go on to further study to become practising solicitors or barristers but the course is designed to allow students to pursue a wide range of careers. Graduates may work for other providers of legal services and regulatory agencies, non-governmental bodies and international non-governmental organisations, the Law Commission, the European Union and the Civil Service. Graduates often successfully apply for places on general graduate training programmes in the retail sector with property firms, investment banks and consultancy firms.

Accreditation

The LLB Law is accredited as a qualifying law degree by the Bar Standards Board.

LLB with Specialisms

Students have the opportunity to specialise in one of the following specific areas of law at the end of year two.

- LLB Law with Commercial Law
- LLB Law with International Law
- LLB Law with Human Rights
- LLB Law with Professional Practice
- LLB Law with Technology

Visit the website for a full list of modules.

Complete University Guide 2025

The School of Science & Technology is a highly skilled and energetic community which has offered courses to meet the needs of the businesses and professions for over 100 years. Our exciting range of courses, involving mathematics, computer science and engineering, are designed to inspire undergraduate students and equip them to meet the challenges of the future. Our Corporate Relations and Employability Unit, unique to the School of Science & Technology, also supports students through the process of undertaking placements, internships and work-based learning, ensuring our students leave City St George's with the skills and experience they need to build a long and fulfilling career.

The information on these pages is correct at the time of printing (February 2025). However, certain details are subject to change and students should refer to our website for up-to-date information.

BSc/MSci Computer Science

BSc UCAS code: G400 | **Duration:** 3 or 4 years (with placement year)

MSci UCAS code: G401 | **Duration:** 4 or 5 years (with placement year)

Become an expert solver of computational problems by learning about programming languages and coding.

Course modules include:

Year one

- Computer science, ethics and society
- Databases
- Introduction to algorithms

Year two

- Computer networks
- Data structures and algorithms
- Language processors

Year three

- Theory of computation
- Functional programming

Year four (MSci only)

- Advanced algorithms and data structures

Career opportunities

The Professional Pathways scheme, unique to City St George's, offers BSc students the opportunity to work while learning. After the first year, students work four days a week in a paid professional computer science role and study with their peers one day a week. Professional Pathways students study the remainder of their course over three years, graduating after a total of four years with a BSc degree and up to three years of professional experience on their CV.

Accreditation

Both courses are accredited by BCS, The Chartered Institute for IT.

BEng/MEng Aerospace Engineering

BEng UCAS code: H406, H407 | **Duration:** 3 or 4 years (with placement year)
MEng UCAS code: H426, H427 | **Duration:** 4 or 5 years (with placement year)

Explore the next phase of aerospace technologies including low emission, low noise and uncrewed aerial vehicles.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design I
- Introduction to mechanics of materials
- Electronics including circuits, digital and analogue electronics

Year two

- The engineer in society: sustainability and circular economy
- Mathematics II
- Engineering design II
- Fluid mechanics

Year three

- Individual project
- Aerospace engineering in the society
- Composite analysis and manufacturing
- Aerospace propulsion

Year four (MEng only)

- Design project group
- Aerospace engineering practice in society
- Computational fluid dynamics
- Structural dynamics and aeroelasticity

Career opportunities

Engineering graduates with multi-disciplinary skills are in demand. Graduates find roles in companies such as Airbus, BAE Systems and AgustaWestland Helicopters. Others take positions in high tech supply chain companies like QinetiQ and Rolls-Royce. Some graduates pursue a career in flying.

Accreditation

Our current Aeronautical Engineering degrees are accredited by the Institution of Mechanical Engineers and the Royal Aeronautical Society. We have every expectation that these new degrees will receive similar accreditation.

First

City St George's was the first institution in the UK to introduce Aeronautical Engineering courses in 1909.

BEng/MEng Civil and Infrastructure Engineering

BEng UCAS code: H290, H291 | Duration: 3 or 4 years (with placement year)

MEng UCAS code: H292, H293 | Duration: 4 or 5 years (with placement year)

Transform the built environment through a consideration of function, social value, economics and sustainability.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design
- Introduction to mechanics of materials and manufacturing

Year two

- The engineer in society: sustainability and circular economy
- Structural mechanics
- Engineering design II infrastructure
- Geology and soil mechanics

Year three

- Individual project
- The engineer in society: infrastructure for net zero
- Finite element analysis of structures
- Geotechnical engineering

Year four (MEng only)

- Design project: integrated infrastructure project
- The engineer in society: infrastructure resilience
- Structural dynamics and stability

Career opportunities

Most graduates enter the civil engineering profession as consultants or contractors. Recent graduates have joined businesses including AECOM, AtkinsRéalis, London Bridge Associates, Balfour Beatty, Joseph Gallagher, Heyne Tillett Steel and Skanska. Graduates have contributed to flagship engineering projects including HS2 and landmark London buildings. The integrated MEng offers the most direct route to achieving Chartered Engineer status.

Accreditation

Our current Civil Engineering degrees are accredited by the Joint Board of Moderators (Institution of Civil Engineers, Institution of Structural Engineers, Institute of Highway Engineers and Chartered Institution of Highways and Transportation). We have every expectation that these new degrees will receive similar accreditation.

BEng/MEng Energy and Sustainability Engineering

BEng UCAS code: HJ69, HJ70 | Duration: 3 or 4 years (with placement year)

MEng UCAS code: HJ71, HJ72 | Duration: 4 or 5 years (with placement year)

Create a sustainable future with a focus on energy technologies, energy demand and supply.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design I
- Introduction to mechanics of materials and manufacturing
- Engineering science

Year two

- The engineer in society: sustainability and circular economy
- Engineering design II: energy
- Mathematics II
- Geology and materials

Year three

- Individual project
- The engineer in society: energy for all
- Renewable energy systems
- Energy in the built environment

Year four (MEng only)

- Design project group
- The engineer in society: environment
- Smart grids and power systems
- Energy economics and finance

Career opportunities

Graduates progress to business development and project management positions in engineering, design, construction, manufacturing and energy firms and consultancies. Qualified engineers achieve positions in energy, engineering, utility and renewable energy businesses. Recent employers include Ford, Rolls-Royce, BP and Howden among many others.

Accreditation

Our current Civil Engineering degrees are accredited by the Joint Board of Moderators (Institution of Civil Engineers, Institution of Structural Engineers, Institute of Highway Engineers and Chartered Institution of Highways and Transportation). We have every expectation that these new degrees will receive similar accreditation.

Sustainability

There is a growing demand for professionals to address complex energy challenges

Entry requirements

A-level: BBB (including Mathematics or Physics, or two other science subjects).

BTEC: D*DD in Engineering (RQF Engineering with minimum grade D in units 1 Engineering principles, 7 Calculus to solve engineering problems and 8 Further engineering mathematics).

Tariff: 120 UCAS tariff points.

IB: 30 points overall, including grade 5 in Mathematics at Higher level or grade 7 in Mathematics at Standard Level, grade 5 in Physics/Biology/Chemistry at Higher Level, and grade 5 in English at Standard Level.

GCSE: A minimum of grade 4/grade C in English Language and Mathematics.

English language requirements

IELTS: 6.0 overall with a minimum of 6.0 in each component.

International equivalents

Scan for City St George's equivalences.

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

BEng/MEng Engineering Systems

BEng UCAS code: HH31, HH32 | **Duration:** 3 or 4 years (with placement year)
MEng UCAS code: HH33, HH34 | **Duration:** 4 or 5 years (with placement year)

Solve social problems through the application of knowledge, skills, and experience in mechatronics, electrical, electronic and systems engineering.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design I
- Introduction to mechanics of materials and manufacturing
- Electronics I including circuits, digital and analogue electronics

Year two

- The engineer in society: sustainability and circular economy
- Mathematics II
- Engineering design II
- Signals and communications

Year three

- Individual project
- Systems engineering in the society
- Control engineering
- Advanced programming

Year four (MEng only)

- Design project group
- Systems engineering practice in society
- Robotics imaging and vision
- Digital communication and signal processing

Career opportunities

Graduates find roles in aerospace, automotive, consumer appliances, defence, manufacturing and renewable energy businesses.

Accreditation

We have every expectation that these degrees will receive accreditation from the Institution of Engineering and Technology (IET) and Institute of Measurement and Control (InstMC).

BEng/MEng Engineering with Business

BEng UCAS code: H10N, H11N | Duration: 3 or 4 years (with placement year)
MEng UCAS code: H12N, H13N | Duration: 4 or 5 years (with placement year)

Acquire and apply the knowledge needed for the growth and management of engineering businesses. Succeed in the dynamic world of technology-driven business.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design I
- Principles of interdisciplinary thinking in engineering and business
- Electronics including circuits, digital and analogue electronics

Year two

- The engineer in society: sustainability and circular economy
- Mathematics II
- Project management
- Finance and accounting

Year three

- Individual project
- The engineer in society: ethical business
- Supply chain management
- Strategy in engineering and technology firms

Year four (MEng only)

- Group project
- Engineering with business in society
- Design thinking
- Product design and management

Career opportunities

Graduates achieve roles in engineering, design, construction, manufacturing and energy firms. They are equipped to contribute to the creation of energy-efficient homes, offices and factories.

Accreditation

We have every expectation that these degrees will receive accreditation from the Institution of Engineering and Technology (IET).

BEng/MEng Mechanical and Design Engineering

BEng UCAS code: H350, H351 | Duration: 3 or 4 years (with placement year)

MEng UCAS code: H352, H353 | Duration: 4 or 5 years (with placement year)

Train for a professional career in mechanical engineering, gaining robust analytical, design and project leadership skills.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design I
- Introduction to Mechanics of materials and manufacturing
- Electronics including circuits, digital and analogue electronics

Year two

- The engineer in society: sustainability and circular economy
- Mathematics II
- Engineering design II
- Fluid mechanics

Year three

- Individual project
- Mechanical engineering in the society
- Structural analysis and FEM
- Engineering design (CAD-CAM)

Year four (MEng only)

- Design project group
- Mechanical engineering practice in society
- Computational fluid dynamics
- Energy, infrastructure and sustainability

Career opportunities

Recent graduates have obtained various roles with Ford, Howden, Delphi Diesel Systems, AVL, Rolls-Royce, Jaguar Land Rover, Tube Lines and Holroyd.

Accreditation

Our current Mechanical Engineering degrees are accredited by the Institution of Mechanical Engineers. We have every expectation that these new degrees will receive similar accreditation.

Versatility

Students will gain the ability to adapt and excel across diverse aspects of engineering

92%

of mechanical engineering students in work have secured a graduate role 15 months after graduating

BSc Mathematics with Business

UCAS code: G1N1 or G11N

Duration: 3 or 4 years (with placement year)

Explore a wide range of mathematical topics, build acumen in business, and develop management skills tailored to solve real-world problems.

Course modules include:

Year one

- Algebra
- Introduction to managing people and change
- Functions, vectors and calculus

Year two

- Real analysis
- Programming and data science for the professions
- Introduction to entrepreneurship

Year three

- Differential equations
- Graph theory
- Operations and supply chain management

Mathematics with Business was created with academics from Bayes Business School who teach throughout the degree.

Entry requirements

A-level: ABB including grade A in Mathematics or Further Mathematics.

BTEC: DD and A-level Mathematics grade A.

Tariff: 128 UCAS tariff points.

IB: 31 points overall, including grade 6 in Mathematics at Higher Level and grade 5 in Standard Level English.

“

Studying at City St George's has been an incredible journey, blending hands-on experiences with innovative problem-solving to shape my future in engineering.

”

READY TO APPLY?

We offer high-quality, challenging courses to applicants who demonstrate the preparation and potential to succeed. If you have the potential we are looking for, we will help you to maximise your chances of studying at City St George's.

Our admissions and selection processes aim to assess you fairly and consistently. We judge applications on individual merit, taking into account your academic achievements, relevant experience and motivation to undertake the course.

How to apply

All students who want to apply to an undergraduate course at City St George's (and most other UK universities) need to apply through the Universities and Colleges Admissions Service (UCAS). The equal consideration national deadline to apply for university is usually in October for early deadline courses including Medicine, and January for all other courses. More details can be found on the UCAS website: www.ucas.com

Typical entry requirements

Typical offers will be conditional and stipulate certain grades to be attained in your final year of a Level 3 qualification.

The UCAS tariff allocates points to various qualifications, allowing us to make comparisons between applicants with different qualifications. An explanation of the UCAS tariff and a full list of the qualifications it covers are available on the UCAS website.

If you receive an offer that contains a tariff points score, you must read the conditions carefully to ensure you understand what you are required to achieve. City St George's may exclude some qualifications or units from grade or tariff based offers we make, please see our course pages for more details.

We welcome applications from candidates offering combinations of qualifications, most typically A-level and BTEC. Many of our courses also accept a range of qualifications not listed in the prospectus including CTEC, T-levels and the Access to HE diploma. Please see our course pages for details on the qualifications we accept for each course and the grades required.

In addition to the general requirements, admission to most courses requires grades in a specific subject or subjects relevant to the course. See the entry requirements box on each course page or visit the course webpage for more details.

Tuition fees

City St George's undergraduate fee for UK students joining in 2025/26 is £9,535 for the first year of study, in line with the Government's announcement on the fee cap increase (subject to the passing of secondary legislation). Fees may increase in subsequent years in line with government policy. You can find up-to-date fee information for UK and international students on our website.

Contextual admissions

City St George's uses contextual admissions to take into account varying individual circumstances and institutional barriers faced by applicants during the application process.

When we assess your application, we will consider your qualifications alongside other information on your Universities and Colleges Admissions Service (UCAS) form and in some cases, this will mean you will receive a reduced grade offer from us. This is called a contextual offer.

A contextual offer is a reduction of up to two grades below our standard entry requirements. More information about our eligibility for contextual offers and examples of the offers you may receive can be found at www.citystgeorges.ac.uk/contextual-admissions

Equal opportunities

All applications are considered on individual merit and in accordance with our equal opportunities policy. Our admissions staff will consider your qualifications, background and experience and aim to ensure that you are given full and equitable treatment in pursuing your chosen course of study.

We understand the differences between education providers and endeavour not to disadvantage certain applicants who have been unable to complete certain qualifications that may be available to applicants elsewhere. We appreciate that we will be presented with students who have a wide variety of qualifications and subjects as part of their applications. We will ensure that applicants who demonstrate the academic potential to perform on our courses are given every opportunity to meet our offer and study here.

We admit students with the potential to succeed in higher education and welcome applications from people regardless of their gender, religion, age, race, national origin, social background, marital or parental status, sexual orientation or disability. We are also committed to the principles of widening participation and encourage applicants from disadvantaged and non-conventional academic backgrounds.

Terms and conditions

A student's time at City St George's, University of London will be subject to City St George's Terms and Conditions, which will be made available to all students accepted onto our courses.

Admissions policies and procedures

The University's admissions policy and related documents are available in full at: www.citystgeorges.ac.uk/about/governance/policies/admissions-policy

FOUNDATION COURSES

Foundation courses offer a route into City St George's for students that do not meet City St George's direct entrance requirements. In addition to offering several in-house courses (information on which is available on the relevant course pages), students can study a foundation course offered by the following partner institutions.

City St George's, University of London International Study Centre

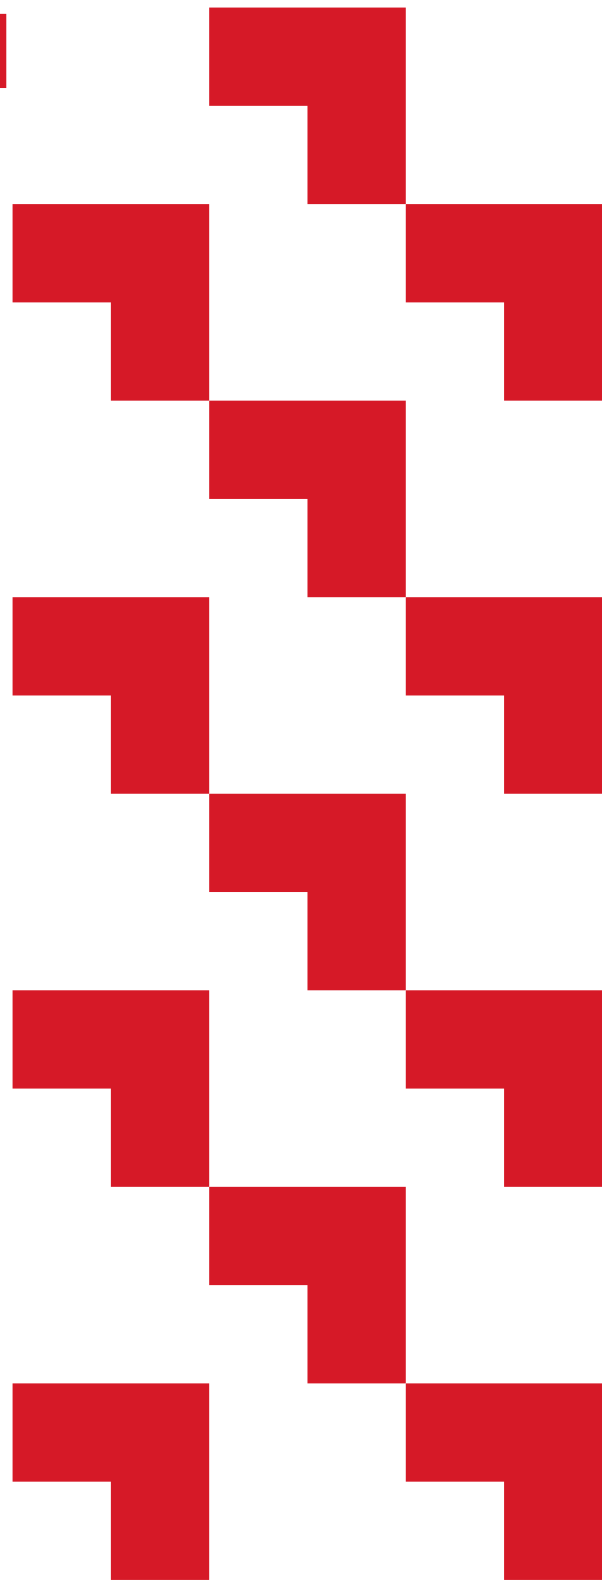

Our dedicated study centre for international student preparation courses. Students are members of the City St George's community from day one, with access to facilities, clubs and societies as well as dedicated support from City St George's staff. Progression to a wide range of undergraduate degrees at City St George's is guaranteed, subject to meeting the requirements. For more information, visit www.citystgeorgesisc.com

Kaplan

Kaplan offers comprehensive academic and wellbeing support, and opportunities to build career skills are included in every course. Students can also access certain City St George's services and facilities and are guaranteed progression if they meet the agreed progression requirements. For more information, visit www.kaplanpathways.com

Capital City College Group

Capital City College Group offer a one-year foundation course that prepares students for entry into the first year of City St George's BEng Engineering courses. For more information, visit www.capitalccg.ac.uk/courses

Parking

Secure parking for bicycles is available on campuses.

Parking in central London is limited and can be costly. There is metered parking available on the roads surrounding the Clerkenwell campus. Please also note that almost all of City St George's Clerkenwell sites are within the congestion charging zone and drivers are liable to pay a daily charge.

For the Tooting campus, there is a limited number of pay-and-display parking in the area, we advise using public transport where possible.

The Transport for London website provides up-to-date information on public transport: www.tfl.gov.uk
