School of Policy & Global Affairs

The School of Policy & Global Affairs is a dynamic community, home to an inclusive mix of students, both local and global. It has around 2,400 students and over 100 academic staff.

At the School of Policy & Global Affairs, we proudly integrate the award-winning Career Activation Programme into our curriculum, ensuring students gain the skills needed to connect their academic study to their career goals.

The School's academic team includes two dedicated employability lecturers, whose objective is to help students build skills for the workplace. At the start of their studies,

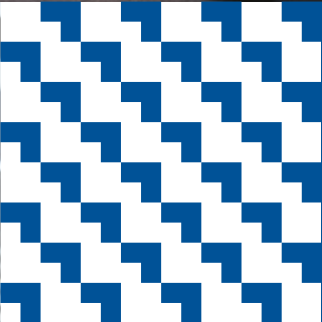

students participate in a career-focused 'Finding your future' module designed to help them make practical sense of their course and explore diverse career pathways.

By the end of their studies, every student will have engaged in a professional experience module or completed a placement, equipping them with real-world skills and experiences to confidently navigate their post-graduation ambitions.

“

When it comes to the teaching of my course, I like that I can speak to my lecturers in a relaxed manner. This helps to create a positive experience where you can build rapport.”

Rianna Mayor, Economics

School of Communication & Creativity

The School of Communication & Creativity supports and develops the next generation of practitioners and entrepreneurs who work across the cultural, creative, music, heritage and media sectors.

We know diversity fosters creativity and innovation as our students come together from around the world, and from diverse educational and cultural backgrounds. We are dedicated to creating a place where everyone can thrive and belong, and we seek to empower students both to help us shape how we do this and to become future change-makers in the creative and communication industries.

“Each module on the Journalism course has given me a well-rounded understanding of the industry and enabled me to develop skills in many different areas, from broadcast to feature writing. I now feel prepared to confidently enter the workforce.”

Ben De Leon, Clinical Pharmacology

School of Health & Medical Sciences

The School of Health & Medical Sciences is a leading provider of education in the fields of healthcare, medicine and psychology, offering a wide breadth of courses.

We take pride in nurturing and developing the next generation of clinical practitioners and leaders. Through our strategic partnerships with top healthcare providers in London and the South of England, our students gain excellent placement experiences, ensuring they are prepared for their future careers.

Our students come together from diverse educational and cultural backgrounds to use state-of-the-art clinical skills facilities at our Clerkenwell and Tooting (based in St George's Hospital) campuses, which create an exciting and innovative learning environment.

No. 1
in London for health
professions

The Guardian University Guide 2026

250
years of delivering
medical education

The information on these pages is correct at the time of printing (February 2026). However, certain details are subject to change and students should refer to our website for up-to-date information.

Gain the knowledge, skills and experience to become a confident and resilient doctor ready to provide excellent and compassionate care for patients.

Course modules include:

Year one and two

- In the first two years of the course, students will learn about basic clinical sciences, mechanisms of disease and the ethical, psychological and social context of health, while developing their clinical and communication skills, integrated with early patient contact in hospital and community placements. Students will have the opportunity to apply to intercalate after year two.

Transition (T) year (year three)

- In T year, the emphasis shifts to a combination of problem-based learning and experiential learning on five-week clinical placements in medicine, surgery and general practice, with a student-selected component allowing students to develop their own interests.

Penultimate (P) year and final (F) year (years four and five)

- In P year, almost all learning is on clinical placements, including first exposure to a range of specialist areas, allowing students to hone their diagnostic skills and become confident developing investigation and management plans.
- F year lays the groundwork to becoming a foundation doctor, with assistantships in general practice, medicine and surgery, emergency medicine, critical care and anaesthetics as well as a public health block and an elective.

Career opportunities

Successful graduates go on to a diverse range of careers, with the vast majority choosing to complete the GMC Foundation Programme to practice medicine in the UK.

Accreditation

This course is accredited and quality assured by the General Medical Council.

Entry requirements

UCAT: minimum 500 in each individual section. Minimum overall UCAT score (calculated every year)

A-level: AAA, including Chemistry and Biology

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 39 credits at Distinction and 6 credits at Merit in Medicine. Biology and Chemistry credits must be at Distinction

IB: 35 points overall, including 18 points at Higher Level and grade 6 Biology and Chemistry

GCSE: A minimum of grade 6/grade B in five subjects, including English Language, Mathematics and Science (Double or Triple Award)

BMid Midwifery

UCAS code: B715

Duration: 3 years (with placements throughout the course)

Location:
Clerkenwell campus

Prepare for a fulfilling and rewarding career as a midwife.

Course structure:

Year one

- Students learn to discuss underlying concepts and principles associated with midwifery and apply these within the context of their practice.

Year two

- Builds upon previous knowledge and experience. Students develop skills of enquiry in the subject and develop different approaches to problem-solving and interpreting the context of their practice.

Year three

- Students develop a coherent, systematic and detailed knowledge of midwifery practice and theory. They learn to develop techniques for practice drawing on research and scholarship, demonstrating their role as a reflective practitioner.

Career opportunities

Graduates secure employment with local NHS Trusts throughout London and nationwide, working in community services, birth centres and obstetric units, and as consultant midwives.

Accreditation

This course is accredited by the Nursing and Midwifery Council.

Entry requirements

A-level: BBB

BTEC: DDM (Health and Social Care or science-related subjects only)

BSc Children's Nursing

UCAS code: B703

Duration: 3 years (with placements throughout the course)

Location:
Clerkenwell campus

Prepare for a dynamic and rewarding career providing care to children and young people, focusing on family-centred care to improve the overall health and wellbeing of our future.

Course structure:

Year one

- Students will take part in simulated practice and clinical skills, and have practice placements to develop foundational nursing theory and practice for children and young people.

Year two

- Builds upon the theory and practice from year one, with a strong emphasis on public health and management of acute deterioration in the child and young person. Practice placements form a key element of this year.

Year three

- Student practice placements provide an opportunity to experience complex, high-dependency nursing care. This enables them to consolidate their theory and practice, using a more critical approach to complex nursing care.

Career opportunities

Our course offers a rich variety of practice-based learning across London, enabling students to establish where they want to start their career as a children's nurse. Graduates are highly sought after by NHS trusts including Barts Health NHS Trust Hospitals, Great Ormond Street Hospital for Children NHS Foundation Trust, Homerton Healthcare NHS Foundation Trust, University College London Hospitals NHS Foundation Trust, and Royal Free London NHS Foundation Trust, as well as various community settings.

Accreditation

This course is accredited by the Nursing and Midwifery Council.

Entry requirements

A-level: BBC

BTEC: DMM (Health and Social Care, Children's Care, Learning and Development, Sport and Exercise Sciences, or science-related subjects only)

BSc Mental Health Nursing

UCAS code: B702

Duration: 3 years (with placements throughout the course)

Location:
Clerkenwell campus

Learn to provide holistic care, helping people with mental health problems to be physically safe and emotionally secure.

Course modules include:

Year one

- Foundations of evidence – informed nursing practice
- Mental health and wellbeing in integrated care
- Practice 1 – Foundations for nursing care

Year two

- Acute care management
- Pathophysiology and therapeutics for nursing practice
- Critical use of evidence to inform decision making in practice

Year three

- Leading and managing others
- Principles of prescribing
- Preparing to be a proficient practitioner

Career opportunities

Mental Health Nursing offers diverse career opportunities and our graduates secure employment in a range of community, specialist and inpatient settings. Graduates are highly sought after by NHS Trusts including East London NHS Foundation Trust, South West London and St George's Mental Health NHS Trust and Oxleas NHS Foundation Trust.

Accreditation

This course is accredited by the Nursing and Midwifery Council.

Entry requirements

A-level: BBC

BTEC: DMM (Health and Social Care, Sport and Exercise Sciences, Applied Psychology, Children's Care, Learning and Development, or science-related subjects only)

Tariff: 112 UCAS points

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits) in Nursing, Midwifery, Health, Science or Social Care: 45 credits at level 3 including 15 credits at Distinction and 30 credits at Merit

BSc Occupational Therapy

UCAS code: B920

Duration: 3 years (with placements throughout the course)

Location:
Tooting campus

Enable people with physical and mental health challenges to participate in daily activities that matter to them.

Course modules include:

Year one

- Essentials for allied health professionals
- Theory and practice of occupational therapy 1
- Understanding the evidence base

Year two

- Human occupations across the lifespan
- Occupations in context
- Applying the evidence base

Year three

- Contributing to the evidence base
- Advancing occupational therapy practice
- Reflection and leadership in occupational therapy

Career opportunities

Graduates will be eligible to apply for both the Health and Care Professions Council and the Royal College of Occupational Therapists. As well as working with individual service users and their families, graduates can also work with groups and communities, or as part of a multidisciplinary team in various settings, such as hospitals, schools, clinics and charities.

Accreditation

This course is accredited by the Health and Care Professions Council, Royal College of Occupational Therapists and World Federation of Occupational Therapists.

Entry requirements

A-level: BBB

BTEC: DDM

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 21 credits at Distinction and 24 credits at Merit

IB: 30 points overall, including 15 points at Higher Level

GCSE: A minimum of grade 4/grade C in five subjects, including English Language, Mathematics and Science (Double or Triple Award)

MOptom Master of Optometry

UCAS code: B510

Duration: 4 years (with placements throughout the course)

Location:
Clerkenwell campus

Prepare for a career in optometry at the only university in London to offer an undergraduate course in the subject.

Course modules include:

Year one

- Biomedical sciences for optometry
- Fundamental clinical and professional practice skills
- Optics for optometry

Year two

- Ocular diseases and management
- Advancing clinical skills
- Contact lenses

Year three

- Clinical and professional practice
- Binocular vision and paediatrics
- Visual impairment

Year four

- Clinical learning in practice 1 and 2
- Clinical decision making

Career opportunities

Optometry offers a diverse and flexible career, with opportunities in high street and independent practice, hospitals, research and teaching. Graduates can develop their skills and interests in a range of specialisms.

Accreditation

This course is accredited by the General Optical Council.

Entry requirements

A-level: AAB (including two from Biology, Chemistry, Mathematics or Physics)

BTEC: DD (Applied Science, Medical Science or Biomedical Science) in addition to an A-level B grade or above in Biology, Mathematics or Physics

Tariff: 136 UCAS points

IB: 33 points overall, including 6 in two Higher Level sciences, 5 in Standard Level English and 4 in Standard Level Mathematics

GCSE: A minimum of grade 4/grade C in five subjects, including English Language and Mathematics

Students train with the latest equipment and techniques at our on-campus optometry clinic, City Sight

English language requirements

IELTS: 7.0 overall with a minimum of 7.0 in each component

We accept a range of other qualifications and have a contextual admissions policy. Please see our website for more detail.

Additional requirements

- Have enhanced disclosure and barring service (DBS) clearance.
- Complete an occupational health questionnaire.
- Be eligible for student registration with the General Optical Council and maintain this registration throughout the course; more information will be provided on application.

BSc Paramedic Science

UCAS code: B781

Duration: 3 years (with placements throughout the course)

Location:
Tooting campus

Train to become a paramedic in state-of-the-art simulation labs, including immersive rooms, and gain hands-on experience through diverse, real-world placements.

Course modules include:

Year one

- Introduction to paramedic clinical care
- Applied critical care for paramedics

Year two

- Trauma care for paramedics
- Assessment and evaluation of mental health in out-of-hospital setting
- Professional practice 2

Year three

- Paramedic management of minor health problems
- Transition to paramedic practice

Career opportunities

Graduates can work in a variety of environments including traditional 999 ambulance services, GP practices, walk-in centres, minor injuries units, helicopter emergency services, research establishments, and remote environments like oil rigs or expeditions. Students can apply for registration with the Health and Care Professions Council on successful completion of the course.

Accreditation

This course is officially approved by the Health and Care Professions Council and is also endorsed by the College of Paramedics.

Entry requirements

A-level: BBB including one science subject (Biology, Chemistry, Physics, Psychology or Sociology)

BTEC: DDM (science or healthcare subject)

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 21 credits at Distinction and 24 credits at Merit in a science or healthcare subject (30 credits must be in a science subject)

IB: 30 points overall, including 14 points at Higher Level and 5 in Higher Level Biology or Chemistry

GCSE: A minimum of grade 4/grade C in five subjects, including English Language, Mathematics and Science (Double or Triple Award)

Gain real-world experience on evolving, interprofessional placements every year of the course

English language requirements

IELTS: 7.0 overall with a minimum of 7.0 in Writing and 6.5 in all other components

BSc Diagnostic Radiography

UCAS code: B821
Duration: 3 years (with placements throughout the course)

Location:
Clerkenwell or
Tooting campus

Learn to diagnose disease and trauma by producing and interpreting images.

Course modules include:

Year one

- Anatomy and physiology
- Clinical imaging
- Radiographic science and technology

Year two

- Radiography research*
- Advanced science and technology
- Advanced clinical imaging

Year three

- Dissemination of research*
- Professional development and employability*
- Equipment design and quality management systems

Career opportunities

Graduates find employment in the NHS and private hospitals, with some choosing to practise internationally.

Accreditation

Graduates are professionally recognised by the Society and College of Radiographers and are eligible to apply for registration with the Health and Care Professions Council to practise in the UK as a diagnostic radiographer.

Entry requirements

BSc/MSci Biomedical Science

BSc UCAS code: B940 | **Duration:** 3 years (plus optional additional placement year) | **Location:** Tooting campus
MSci UCAS code: B942 | **Duration:** 4 years (plus optional additional placement year)

Discover the science underlying health and disease, while developing key research and employability skills.

Course modules include:

Year one

- Causes of disease
- Experimental biology
- Physiology
- Professional and academic skills

Year Two

- Mechanisms of disease
- Immunology
- Genomics
- Professional and academic skills

Year three

- A choice of specialist pathway, subject to availability
- Research project (semester long)
- Research and science communication skills

Year four (MSci only)

- Research proposal
- Research project (academic year long)

Students can also opt to undertake an additional Professional Training Year, which is credit bearing.

Career opportunities

Career and employability education is embedded within the curriculum, which supports students to develop the top ten skills employers are looking for. Our graduates are highly sought after and pursue a diverse range of career paths or continue to further education.

Career paths include those in the biomedical sector, as well as academic and clinical research within a variety of pharmaceutical and bioscience companies and institutes. Graduates continuing in education have gone on to study a range of master's, PhDs, graduate entry medicine and other vocational healthcare courses. Graduates also transfer their skills into employment within a wide range of other sectors including finance, law and teaching.

BSc Clinical Pharmacology

UCAS code: B210
Duration: 3 years (with placement)

Location:
Tooting campus

Explore how medicines work and what it takes to create new treatments to fight diseases. This course is the only undergraduate course of its kind in the UK.

Course modules include:

Year one

- Fundamentals of science
- Drug development
- Data and statistics

Year two

- Skills portfolio
- Pharmacodynamics
- Research project

Year three

- Pharmacokinetics
- Drug development
- Data analysis

Career opportunities

With the race to find new drugs and vaccines in the fight against new infections and diseases, clinical pharmacologists are needed now more than ever. Graduates find work in drug regulation, running clinical trials and researching disease processes. Employers include the NHS, where they are critical to medicine management, and regulatory organisations such as the National Institute for Health and Care Excellence and the Medicines and Healthcare Products Regulatory Agency.

BSc Healthcare Science (Physiological Sciences)

UCAS code: B120
Duration: 3 years (with placement)

Location:
Tooting campus

Embark on a journey in becoming a clinical cardiac or respiratory/sleep physiologist, diagnosing conditions and providing vital treatments.

Course modules include:

Year one

- Science of healthcare
- Cardiovascular and respiratory sleep science
- Clinical training 1

Year Two

- Cardiology/respiratory – sleep specialism
- Pathophysiology
- Clinical training 2

Year three

- Cardiology/respiratory – sleep specialism
- Research project
- Clinical training 3

This course offers two specialisms. The cardiac specialism allows students to carry out diagnostic and interventional investigations, monitoring and analytical procedures. In the respiratory/sleep sciences specialism, students learn to work with patients with a variety of respiratory and sleep disorders to determine causes and monitor patient responses to treatment.

Career opportunities

Graduates will be eligible for professional registration with the Academy for Healthcare Science and can apply for Clinical Physiologist roles. Graduates may also apply for the Scientist Training Programme, graduate entry medicine, other postgraduate courses or industry roles.

Accreditation

This course is accredited by the National School of Healthcare Science.

Entry requirements

A-level: BBB (including Biology and one other science subject)

BTEC: DDM (Applied Science)

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits): 45 credits at Level 3, including 21 credits at Distinction and 24 credits at Merit in a science subject

IB: 30 points overall, including 15 points at Higher Level and 5 in Biology

GCSE: A minimum of grade 4/grade C in five subjects, including English Language, Mathematics and Science (Double or Triple Award)

BSc Speech and Language Therapy

UCAS code: B620
Duration: 3 years (with placements throughout the course)

Location:
Clerkenwell campus

Explore the frontiers of language and communication science at one of the UK's most respected research centres.

Course modules include:

Year one

- Lifespan studies
- Speech and language development
- Professional studies

Year two

- Applied phonetics, phonology and linguistics
- Psychology and research methods
- Speech and language therapy and society

Year three

- Evidence-based practice
- Capstone module: building to autonomous practice
- Research project

Year four (optional)

- Language, learning, development and disorder
- Advanced professional practice
- Research project

Career opportunities

Graduates go on to work as speech and language therapists in health centres, hospitals, schools, charities and universities, as well as in the private sector. Some graduates choose to work internationally.

Accreditation

Graduates can apply to register with the Health and Care Professions Council to practise as a speech and language therapist.

Entry requirements

Foundation Degree Nursing Associate

UCAS code: B71F
Duration: 2 years (with placement)

Location:
Clerkenwell campus

This foundation course equips students with the skills, knowledge and confidence to care for patients as a nursing associate, across the four fields of nursing.

Course modules include:

Year one

- Introduction to health and wellbeing
- Introducing clinical and communication skills in practice
- Introduction to therapeutics and medicines management
- Learning in practice 1

Year two

- Teamworking and improving safety and quality of care
- Consolidating clinical and communication skills
- Promotion of health and development for self and others
- Learning in practice 2

Career opportunities

Graduates can register with the Nursing and Midwifery Council and practice as nursing associates in the UK or overseas (additional registration may be needed in some countries), or go on to study at bachelor's level entering at year two of the BSc Nursing courses at City St George's.

Accreditation

This course is accredited by the Nursing and Midwifery Council.

Entry requirements

A-level: CD

BTEC: MPP (Health and Social Care or science-related subject only)

Tariff: 56 UCAS points

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits) in Nursing, Midwifery, Health Science or Social Care: 45 credits at level 3 including 9 credits at Merit and 36 at Pass

IB: 24 points overall, including 5 in Standard Level English and 4 in Standard Level Mathematics

GCSE: A minimum of grade 4/grade C in English Language and Mathematics or equivalent qualification such as Level 2 Functional Skills/Key Skills in Mathematics and English

English language requirements

IELTS: 7.0 overall with a minimum of 6.5 in each component

Additional requirements

As part of the selection process, shortlisted applicants will be invited to an interview. Students are required to have occupational health and enhanced disclosure and barring service (DBS) clearance.

Course webpage

www.citystgeorges.ac.uk/hcna

HE Certificate Introduction to Diagnostic and Therapeutic Radiography

UCAS code: B82F
Duration: 1 year

Location:
Clerkenwell campus

This foundation course offers an introduction to clinical and professional aspects of radiography, with insights into medical imaging, radiotherapy treatment techniques and patient care.

Course modules include:

- Introduction to science related to healthcare
- Academic skills
- Key skills in health sciences
- Personal and professional development
- Introduction to the diagnostic and therapeutic radiography professions

Career opportunities

Upon successful completion of the Introduction to Diagnostic and Therapeutic Radiography programme, students will become eligible to apply to either BSc Diagnostic Radiography or BSc Therapeutic Radiography courses.

Progression will be dependent on: achieving above 40 per cent overall having successfully completed all modules for this programme; a successful admissions interview; satisfactory Disclosure and Barring Service (DBS) check; Occupational Health clearance; and we recommend a visit to a radiography clinical department.

Entry requirements

A-level: CCC (including one of Mathematics, Chemistry, Physics, Biology)

BTEC: MMM (Medical Science, Applied Science, Forensic Science or Health and Social Care)

Tariff: 96 UCAS points

Access to HE: QAA-recognised Access to HE Diploma (full award – 60 credits) in Radiography or Science: 45 credits at Level 3 including 18 credits at Distinction

IB: 27 points overall, including 5 in Standard Level English and 4 in Standard Level Mathematics

No. 1

HE Certificate Introduction to Health Sciences

UCAS code: B70F

Duration: 1 year

Location:
Clerkenwell campus

This foundation course provides access to one of the following courses: Nursing (Adult, Children's or Mental Health), Midwifery or Speech and Language Therapy.

Course modules include:

- Introduction to science related to healthcare
- Academic skills
- Key skills in health sciences
- Personal and professional development
- Introduction to the healthcare professions

Career opportunities

Upon successful completion of the course and of meeting the progression criteria, students can proceed onto one of the associated undergraduate courses (please refer to our website for the most up-to-date list of associated courses). Graduates will attain a Certificate of Higher Education which they can add to their CVs.

HE Certificate Introduction to Optometry

UCAS code: B513

Duration: 1 year

Location:
Clerkenwell campus

This foundation course provides access to the MOptom Optometry at City St George's or further study leading to a career in optometry.

Course modules include:

- Introductory biological sciences
- Optometric physics
- Quantitative methods for optometry
- Introduction to clinical skills
- Personal and professional development

Career opportunities

Successful completion of this course will result in a Certificate of Higher Education in Introduction to Optometry (European Qualifications Framework level 4). This can lead to several career routes including progression onto MOptom at City St George's (subject to meeting entry requirements), progression onto other higher education courses at City St George's or other institutions, or optical assistant roles within the private sector or the NHS Hospital Eye Service.

Intercalated BSc Medical Sciences

Duration: 1 year

Location:
Tooting campus

Intercalation involves taking a year out of a medicine course to undertake an additional degree (either at undergraduate or postgraduate level). It is an exciting opportunity for current medical students to expand their skillset and knowledge by studying a specific area of interest.

Course modules include:

Five specialisms are offered to degree level, with each specialism providing students with the unique opportunity to study closely related topics that underpin current medical practice.

Intercalated BSc Anatomy

- Development and disease
- Images of anatomy
- Clinically applied musculoskeletal anatomy

Intercalated BSc Infection and Immunity

- Medical microbiology
- Immunity and infection
- Neglected tropical diseases

Intercalated BSc Medical Ethics and Law

- Future of medicine ethics and neuroethics
- Research ethics and clinical ethics
- Medical ethics and law

Intercalated BSc Physiology and pharmacology

- Cardiovascular and respiratory diseases
- Science of reproduction
- Pharmacology and physiology of drugs of abuse

Intercalated BSc Psychology, psychiatry and neuroscience

- Clinical neuroscience
- Psychology and psychiatry of the mind
- Neuroscience of sensation and perception

Career opportunities

This course offers a unique opportunity to explore an area of interest in more depth. Students develop critical appraisal and analytical skills that are invaluable for all future clinicians, especially for aspiring clinical academics, or for medical students interested in more competitive specialities.

Entry requirements

Students must currently be enrolled on a 5-year MBBS and have passed year one and year two of the course at the point of entry. Applications from both home and overseas students are welcome.

Course webpage

www.citystgeorges.ac.uk/medical-science-ibsc

Intercalated BSc Clinical Pharmacology

Duration: 1 year

Location:
Tooting campus

Intercalation involves taking a year out of a medicine course to undertake an additional degree (either at undergraduate or postgraduate level). It is an exciting opportunity for current medical students to expand their skillset and knowledge by studying a specific area of interest.

Course modules include:

- Hot topics
- Molecular aspects of drug targets
- Advanced data and statistics
- Advanced drug development
- Advanced drugs in healthcare

Career opportunities

This course is ideal for medical students interested in developing a career in NHS-based clinical pharmacology, pharmaceutical medicine or research.

It provides excellent preparation for postgraduate research or specialty training. Students gain insights into careers in industry, the NHS and academia.

Entry requirements

Students must currently be enrolled on a 5-year MBBS and have passed year one and year two of the course at the point of entry. Applications from both home and overseas students are welcome.

Course webpage

www.citystgeorges.ac.uk/clinical-pharmacology-ibsc

“

A lot of pride comes from being a paramedic student at City St George's. Being taught by those who either work or have worked in all aspects of paramedicine, and being inspired by their stories and first-class teaching, to working alongside healthcare professionals for the best experience.”

– Timothy Stringer,
Paramedic Science

The City Law School

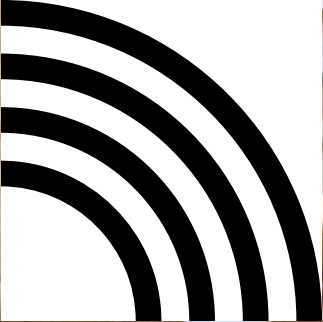

114 LLB Law
115 LLB Law and Criminology

Top 10

in London for law

Complete University Guide 2026

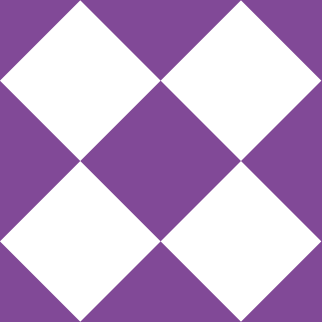

The City Law School

The City Law School is not just a place of learning, it is a community of diverse minds and a hub for future leaders and innovators in the legal profession.

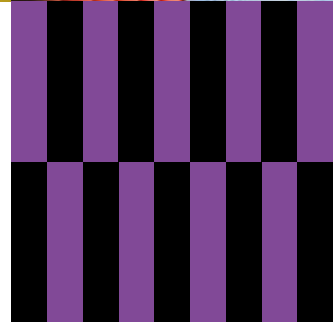

We proudly continue our legacy of over 170 years in preparing a diverse and inclusive student body for thriving careers in the legal professions, business and public service by providing a comprehensive approach to legal education and opportunities for real-world practice. Our location in central London brings students into close proximity to major UK and international law firms, courts and tribunals, including the Inns of Court and the Royal Courts of Justice.

“

The excellent location in the heart of London allowed me to balance professional and personal development with many of the best legal firms nearby.”

Daria Eremina, Law

Est. 1852

One of the earliest providers of legal education in London, with a historic legacy of leadership, innovation and excellence

4 Prime Ministers

were educated at the Inns Court of Law, which later became The City Law School

The information on these pages is correct at the time of printing (February 2026). However, certain details are subject to change and students should refer to our website for up-to-date information.

Develop the legal skills and knowledge to succeed in law and other fields.

Course modules include:

Year one

- Principles of criminal law
- Principles of contract law
- Principles of public law and human rights

Year two*

- Principles of EU law
- Principles of land law
- Principles of tort law

Year three

- Principles of equity and trusts
- Human rights, technology and society
- Global issues in corporate law

Career opportunities

After completing the course many students go on to further study to become practising solicitors or barristers but the course is designed to allow students to pursue a wide range of careers. Graduates may work for other providers of legal services and regulatory agencies, non-governmental bodies and international non-governmental organisations, the Law Commission, the European Union and the Civil Service. Graduates often successfully apply for places on general graduate training programmes with property firms, investment banks and consultancy firms.

Accreditation

This course is accredited by the Bar Standards Board.

Entry requirements

A-level: ABB

BTEC: DDM

Tariff: 128 UCAS tariff points.

IB: 31 points overall, including 4 in Higher Level English or 5 in Standard Level English and 4 in Standard Level Mathematics

GCSE: A minimum of grade 4/grade C in English and Mathematics

Employability focus with opportunities for placements, pro bono and volunteering

English language requirements

IELTS: 7.0 overall with a minimum of 6.0 in each component

** Students can specialise in one of the following specific areas of law at the end of year two: commercial law, international law, human rights, professional practice or technology.*

Got a question about admissions?
www.citystgeorges.ac.uk/contact

Gain foundational legal knowledge and cutting-edge criminological insight for a career in legal practice, criminal justice, or social reform.

Course modules include:

Year one

- Principles of criminal law
- Principles of public law and human rights
- Introduction to criminology

Year two

- Smart technologies, law and justice
- Gender and crime
- Mediation

Year three

- Principles of equity and trust
- Criminal behaviour
- Public sociology and racial justice

Career opportunities

Graduates are well-positioned to pursue careers in legal practice, criminal justice, policy, research and public service. The course also supports progression to postgraduate study, including City St George's Bar Vocational Studies or the Solicitors' Practice Programme for those aiming to qualify as barristers or solicitors.

Entry requirements

School of Science & Technology

The School of Science & Technology is a highly skilled and energetic community which has offered courses to meet the needs of businesses and professions for over 100 years.

Our exciting range of courses in computer science, engineering and mathematics are designed to inspire undergraduate students and equip them to meet the challenges of the future, including rapidly developing areas such as Artificial Intelligence, where we are ranked Top 10 in the UK by the *Daily Mail University Guide 2026*. Our Corporate Relations and Employability Unit, unique to the School of Science & Technology, also supports students through the process of undertaking placements, internships and work-based learning, ensuring our students leave City St George's with the skills and experience they need to build a long and fulfilling career.

“

Studying at City St George's has been an incredible journey, blending hands-on experiences with innovative problem-solving, to shape my future in engineering.”

Become an expert solver of computational problems by learning about programming languages, coding and artificial intelligence.

Course modules include:

Year one

- Computer science, ethics and society
- Databases
- Introduction to algorithms

Year two

- Computer networks
- Data structures and algorithms
- Language processors

Year three

- Theory of computation
- Functional programming
- Introduction to artificial intelligence

Year four (MSci only)

- Advanced algorithms and data structures
- Principles of artificial intelligence
- Data visualisation

Career opportunities

The Professional Pathways scheme, unique to City St George's, offers BSc students the opportunity to work while learning. After the first year, students work four days a week in a paid professional computer science role and study with their peers one day a week. Professional Pathways students study the remainder of their course over three years, graduating after a total of four years with a BSc degree and up to three years of professional experience on their CV.

Accreditation

This course is accredited by BCS, The Chartered Institute for IT.

Entry requirements

A-level: ABB (preferably including Computer Science, Mathematics or a science-related subject)

Explore the next phase of aerospace technologies including low emission, low noise and uncrewed aerial vehicles.

Course modules include:

Year one

- The engineer in society: social responsibility
- Introduction to mechanics of materials
- Electronics including circuits, digital and analogue electronics

Year two

- Mathematics II
- Engineering design II
- Fluid mechanics

Year three

- Aerospace engineering in the society
- Composite analysis and manufacturing
- Aerospace propulsion

Year four (MEng only)

- Aerospace engineering practice in society
- Computational fluid dynamics
- Structural dynamics and aeroelasticity

Career opportunities

Engineering graduates with multi-disciplinary skills are in demand. Graduates find roles in companies such as Airbus, BAE Systems and AgustaWestland Helicopters. Others take positions in high-tech supply chain companies like QinetiQ and Rolls-Royce. Some graduates pursue a career in flying.

Accreditation

This course is expected to receive accreditation from the Institution of Mechanical Engineers and the Royal Aeronautical Society.

Improve healthcare and enhance lives through the design and optimisation of specialist equipment used to diagnose and treat illnesses.

Course modules include:

Year one

- The engineer in society: social responsibility
- Anatomy and physiology
- Electronics including circuits, digital and analogue electronics

Year two

- Biomaterials
- Biomechanics and rehabilitation technology
- Biomedical instrumentation

Year three

- Biomedical and healthcare engineering in society
- Biomedical signal processing
- Biomedical sensors

Year four (MEng only)

- Robotics, vision and imaging
- Healthcare app design
- Wearable and implantable devices

Career opportunities

Career destinations include the NHS and private healthcare providers, regulatory affairs, research and development, tech consultancy, and quality engineering.

Transform the built environment through a consideration of function, social value, economics and sustainability.

Course modules include:

Year one

- The engineer in society: social responsibility
- Engineering design
- Introduction to mechanics of materials and manufacturing

Year two

- Structural mechanics
- Engineering design II: infrastructure
- Geology and soil mechanics

Year three

- The engineer in society: infrastructure for net zero
- Finite element analysis of structures
- Geotechnical engineering

Year four (MEng only)

- Design project: integrated infrastructure project
- The engineer in society: infrastructure resilience
- Structural dynamics and stability

Career opportunities

Most graduates enter the civil engineering profession as consultants or contractors. Recent graduates have joined businesses including AECOM, AtkinsRéalis, London Bridge Associates, Balfour Beatty, Joseph Gallagher, Heyne Tillett Steel and Skanska. Graduates have contributed to flagship engineering projects including HS2 and landmark London buildings. The integrated MEng offers the most direct route to achieving Chartered Engineer status.

BEng/MEng Electrical and Electronic Engineering

BEng UCAS Code: H602 or H642 | **Duration:** 3 or 4 years (with placement year)
MEng UCAS code: H607 or H609 | **Duration:** 4 to 5 years (with placement year)

Location:
Clerkenwell campus

Solve social problems through the application of knowledge, skills and experience in mechatronics, electrical, electronic and systems engineering.

Course modules include:

Year one

- The engineer in society: social responsibility
- Introduction to mechanics of materials and manufacturing
- Electronics I including circuits, digital and analogue electronics

Year two

- The engineer in society: sustainability and circular economy
- Engineering design II
- Signals and communications

Year three

- Systems engineering in the society
- Control engineering
- Advanced programming

Year four (MEng only)

- Systems engineering practice in society
- Robotics imaging and vision
- Digital communication and signal processing

Career opportunities

Graduates find roles in aerospace, automotive, consumer appliances, defence, manufacturing and renewable energy businesses.

Entry requirements

A-level: BBB including Mathematics

BTEC: DDM in Engineering. Distinctions in specific modules required, please see our website for details

Tariff: 120 UCAS points

IB: 30 points overall, including 5 in Standard Level English, 5 in Higher Level or 7 in Standard Level Mathematics and 5 in Higher Level Physics/Biology/Chemistry

GCSE: A minimum of grade 4/grade C in English and Mathematics

English language requirements

IELTS: 6.0 overall with a minimum of 6.0 in each component

BEng/MEng Energy and Sustainability Engineering

BEng UCAS Code: HJ69 or HJ70
MEng UCAS code: HJ71 or HJ72

Duration: 3 or 4 years (with placement year)
Duration: 4 to 5 years (with placement year)

Location:
Clerkenwell campus

Create a sustainable future with a focus on energy technologies, energy demand and supply.

Course modules include:

Year one

- The engineer in society: social responsibility
- Introduction to mechanics of materials and manufacturing
- Engineering science

Year two

- Engineering design II: energy
- Mathematics II
- Geology and materials

Year three

- The engineer in society: energy for all
- Renewable energy systems
- Energy in the built environment

Year four (MEng only)

- The engineer in society: environment
- Smart grids and power systems
- Energy economics and finance

Career opportunities

Graduates progress to business development and project management positions in engineering, design, construction, manufacturing and energy firms and consultancies. Qualified engineers achieve positions in energy, engineering, utility and renewable energy businesses. Recent employers include Ford, Rolls-Royce, BP and Howden among many others.

Accreditation

This course is expected to receive accreditation from the Institution of Mechanical Engineers and Energy Institute.

Entry requirements

A-level: BBB (including Mathematics or Physics, or two other science subjects)

BTEC: DDM in Engineering. Distinctions in specific modules required, please see our website for details

Tariff: 120 UCAS points

IB: 30 points overall, including 5 in Standard Level English, 5 in Higher Level or 7 in Standard Level Mathematics and 5 in Higher Level Physics/Biology/Chemistry

BEng UCAS Code: H10N or H11N
MEng UCAS code: H12N or H13N

Duration: 3 or 4 years (with placement year)
Duration: 4 to 5 years (with placement year)

Location:
Clerkenwell campus

Acquire and apply the knowledge needed for the growth and management of engineering businesses.

Course modules include:

Year one

- The engineer in society: social responsibility
- Electronics including circuits, digital and analogue electronics
- Introductory mathematics and programming

Year two

- The engineer in society: sustainability and circular economy
- Finance and accounting
- Introduction to entrepreneurship

Year three

- The engineer in society: ethical business
- Operations and supply chain management
- Systems integration

Year four (MEng only)

- Engineering with business in society
- Design thinking
- Product design and management

Career opportunities

Graduates achieve roles in engineering, design, construction, manufacturing and energy firms. They are equipped to contribute to the creation of energy-efficient homes, offices and factories.

Accreditation

This course is expected to receive accreditation from the Institution of Engineering and Technology.

Entry requirements

A-level: ABB including Mathematics, Physics or two other Science subjects

BTEC: DDM in Engineering. Distinctions in specific modules required, please see our website for details

Tariff: 128 UCAS points

UCAS Code: GN13 or GN14
Duration: 3 or 4 years (with placement year)

Location:
Clerkenwell campus

Learn about a wide range of mathematical topics including finance and economics with special focus on actuarial science.

Course modules include:

Year one

- Algebra
- Functions, vectors and calculus
- Introduction to probability and statistics

Year two

- Real analysis
- Vector calculus
- Financial reporting

Year three

- Graph theory
- Differential equations
- Introduction to financial derivatives

Career opportunities

Graduates enter the financial and industrial sectors, the Civil Service and research roles. Employers include Barclays Bank, HSBC, KPMG, Mercedes-Benz Financial Services and Standard Chartered Private Bank.

Accreditation

This course is accredited by the Institute of Mathematics and its Applications.

“

Studying engineering has been an insightful journey. I have developed a variety of skills by getting involved in extracurricular projects, which have allowed me to gain unique hands-on experience.”

– Raidah Khan,
Civil and Infrastructure Engineering

READY TO APPLY?

We offer high-quality, challenging courses to applicants who demonstrate the preparation and potential to succeed. If you have the potential we are looking for, we will help you to maximise your chances of studying at City St George's.

Our admissions and selection processes aim to assess you fairly and consistently. We judge applications on individual merit, taking into account your academic achievements, relevant experience and motivation to undertake the course.

How to apply

All students who want to apply to an undergraduate course at City St George's (and most other UK universities) need to apply through the Universities and Colleges Admissions Service (UCAS). The equal consideration deadline to apply for university is usually in October for early deadline courses including Medicine, and January for all other courses. More details can be found on the UCAS website: www.ucas.com

Entry requirements

Typical offers will be conditional and stipulate certain grades to be attained in the final year of a Level 3 qualification.

We welcome applications from candidates offering combinations of qualifications, most typically A-level and BTEC. Many of our courses also accept a range of qualifications not listed in the prospectus including CTEC, T-levels, the Access to HE diploma and all the equivalent international qualifications. Please see course webpages for details on the UK and international qualifications we accept for each course and the grades required.

In addition to the general entry requirements, admission to some courses require grades in a specific subject or subjects relevant to the course. See the entry requirements box on each course page or visit the course webpage for more details.

The UCAS tariff allocates points to various qualifications, allowing us to make comparisons between applicants with different qualifications. An explanation of the UCAS tariff and a full list of the qualifications it covers are available on the UCAS website: www.ucas.com

If students receive an offer that contains a tariff points score, they must read the conditions carefully to ensure they understand what they are required to achieve. City St George's may exclude some qualifications or units from grade - or tariff-based offers we make, please see our course webpages for more details.

If students have a question about their entry requirements or their offer, they should contact our admissions office at: www.citystgeorges.ac.uk/contact

Contextual admissions

City St George's uses contextual admissions to take into account varying individual circumstances and institutional barriers faced by applicants during the application process.

When we assess your application, we will consider your qualifications alongside other information on your UCAS form and in some cases, this will mean you will receive a reduced grade offer from us. This is called a contextual offer.

A contextual offer is a reduction of up to two grades below our standard entry requirements. More information about our eligibility for contextual offers and examples of the offers you may receive can be found at:

www.citystgeorges.ac.uk/contextual-admissions

Equal opportunities

All applications are considered on individual merit and in accordance with our equal opportunities policy. Our admissions staff will consider your qualifications, background and experience and aim to ensure that you are given full and equitable treatment in pursuing your chosen course of study.

We understand the differences between education providers and endeavour not to disadvantage applicants who have been unable to complete certain qualifications that may be available to applicants elsewhere. We appreciate that we will be presented with applicants who have a wide variety of qualifications and subjects as part of their applications. We will ensure that applicants who demonstrate the academic potential to perform on our courses are given every opportunity to meet our offer and study here.

We admit students with the potential to succeed in higher education and welcome applications from people regardless of their gender, religion, age, race, national origin, social background, marital or parental status, sexual orientation or disability. We are also committed to the principles of widening participation and encourage applicants from disadvantaged and non-conventional academic backgrounds.

Fees and funding

City St George's undergraduate fee for UK students is in line with the Government's fee cap, which is reviewed every year. For international students, the fee is dependent on the course of study.

To support with tuition fees as well as the cost of living, we have a wide range of scholarships and bursaries available to students.

For up-to-date information on fees and funding, visit: www.citystgeorges.ac.uk/finance

Terms and conditions

A student's time at City St George's will be subject to the University's Terms and Conditions, which will be made available to all students accepted onto our courses.

Admissions policies and procedures

The University's admissions policy and related documents are available in full at: www.citystgeorges.ac.uk/admissions-policy

FOUNDATION COURSES

Foundation courses offer a route into City St George's for students that do not meet the University's direct entry requirements. In addition to offering several in-house courses (information on which is available on the relevant course pages), students can study a foundation course or International Year One programme offered by the following partner institutions.

City St George's, University of London International Study Centre

Our dedicated study centre for international student preparation courses. Students are members of the City St George's community from day one, with access to facilities, clubs and societies as well as dedicated support from City St George's staff. Progression to a wide range of undergraduate degrees at City St George's is guaranteed, subject to meeting the requirements. For more information, visit:

www.citystgeorgesisc.com

Kaplan

Kaplan offers comprehensive academic and wellbeing support, and opportunities to build career skills are included in every course. Students can also access certain City St George's services and facilities and are guaranteed progression if they meet the agreed requirements. For more information, visit:

www.kaplanpathways.com

Capital City College Group

Capital City College Group offer a one-year foundation course that prepares students for entry into the first year of City St George's BEng Engineering courses. For more information, visit:

www.capitalccg.ac.uk/courses
